Open-Architecture Imaging For DSOs

- Advanced 2D/3D image processing and analysis tools
- Secure cloud storage & off-site backup
- 24/7 access from any location across your organization via any web-connected device
- Reduced IT investment when compared to traditional server maintenance, IT personnel expenses and back-up services
- Affordable, tiered subscription-based pricing

- The VELscope Vx is the leading visualization device for oral mucosal abnormalities, including oral cancer
- Winner of 8 consecutive Cellerant Best of Class awards
- Exclusive Apple iPod integration for photo documentation & case collaboration

TUXEDO
Intraoral Sensor

RAYSCAN α

- TUXEDO Intraoral Sensors provide high-resolution images at a low cost with a 3-year, zero deductible warranty
- The RAYSCAN pan/ceph/3D delivers HD images & advanced online tech support features. Diagnostics, calibrations and updates can be performed remotely with no need for an onsite visit, keeping your schedule full and office moving

3rd Party System Integration

- XVWeb is compatible with all major practice management systems and most imaging devices
- Utilize your preferred combination of software and imaging systems
- Continue using the imaging devices you already invested in with seamless integration into XVWeb
- Never be locked into a specific provider or proprietary imaging infrastructure
- Compatible with products from Carestream, Schick, Gendex and other imaging brands

Our team has years of experience in working with DSOs to achieve their clinical and business objectives. Our goal is to provide a white-glove sales and support experience, always keeping the focus where it belongs - on your success.
